53rd JOTA-WAG interference log sheet October2010

Unfortunately there is a large amateur-radio competition in Germany during the JOTA weekend, called the WAG contest. However, we are pleased that the contest organisers have again arranged for frequencies that are kept free of contest traffic, so we can have a JOTA with minimal interference.
The following frequencies are the **contest-free zone**:

band	**CW** (kHz)	**SSB** (kHz)
80	3560 - 3800	3650 - 3700
40	7040 - 7200	7080 - 7140
20	14060 - 14350	14100 - 14125 & 14280 - 14350
15		21350 - 21450
10		28225 - 28400

Should you encounter contest stations on the above frequencies, please advise them of the contest-free zone. Remember, a Scout is courteous, also on the air.
Should the WAG contest station not want to move out of the contest free zone and causes interference to JOTA radio traffic, please fill out this log:

date	**GMT**	**frequency**	**Call sign of contest station**	**RST**	**remarks**

Your call sign: .....
Your QTH: .....

Please scan this log after the weekend and send it to jota@scout.org; we will inform the contest organizers accordingly.
