

## Membership Registration Tool

### Installation Notes

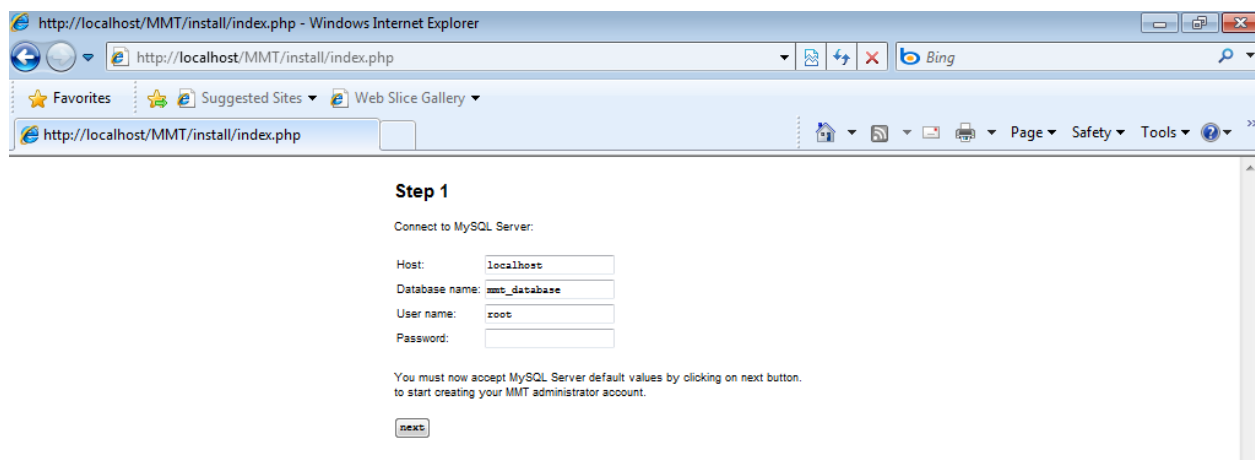

Please note That this software only runs in a PC (Windows) machine.

#### Instructions

1. Plug-in your usb device to the computer.
2. Open the usb drive named "MEMREGTOOL"
3. Double - Click the start icon.

4. An MSDOS window will pop-up. Press any key to continue.
5. The system will now start loading APACHE and MYSQL. you should NOT be running Apache or MYSQL server on the "host" computer, otherwise this software will refused to start from the key
6. Internet explorer (IE) will now open. Please wait for the internet explorer to open.
7. If you receive an error message in the web browser at the end of the startup script wait 1 or 2 minutes and refresh the page in IE (this sometime happen when Apache and MYSQL were't able to start BEFORE internet Explorer try to connect )
8. if after that you 're still having an error you might be "block" by windows firewall or another "internet sécurité" software. try to deactivate them and reload the page.
9. If the IE opens with the STEP1 screen, you successfully loaded the membership registration software.

Please use the User's Manual saved as "MEMREGTOOL User Manual. PDF" to proceed.
