World Scout Environment Programme
Activities & Factsheets

The World Scout Environment Programme offers tools, resources and initiatives to help Scouts all around the world work together for the good of the local and global environment. This World Scout Environment Programme resource book contains Programme Activity Resources in Section 1 and Factsheets in Section 2 to help implement the programme in Scouting throughout the world.

The fifteen Programme Activity Resources relate to each of the five aims for environment education in Scouting and three broad age ranges. A symbol has been used to help illustrate which of the aims the activity is focusing on. These activities are presented to you as examples for how the framework could be implemented amongst local level Scout Groups, though there are many ways to present activities for the World Scout Environment Badge. Wherever possible the programme should be presented outdoors, allowing the Scouts to explore for themselves and discover the natural world.
