Adopting the World Scout Environment Programme

The World Scout Environment Programme is a free, very straightforward, flexible and easy to implement programme and does not compete with National Scout Organizations' existing programmes. It complements them and enables them to fit within a global framework.

The World Scout Environment Programme can be implemented by National Scout Organizations which have agreed to abide to the conditions of use of the programme (see further below).

PACK 1: PROMOTIONAL PACKAGE

The Basic Package is a free educational (non-commercial) package with all the material needed to start the World Scout Environment Programme in the National Scout Organization.

PACK 2: COMMERCIAL USE PACKAGE

This package contains all of the elements of PACK 1 with the additional possibility for the National Scout Organization to create its own financial resources to sponsor its national programme.
